Professional Summary

Full Stack Developer with hands-on experience building scalable web applications using MERN stack and Next.js. Developed AI-powered platforms and role-based systems handling real-time workflows. Strong in REST APIs, authentication, and backend architecture, with working knowledge of Docker, CI/CD, and AWS.

Technical Skills

Frontend: React.js, Next.js, JavaScript

Backend: Node.js, Express.js, REST APIs, Authentication

Databases: MongoDB, PostgreSQL

Cloud & DevOps: Docker, CI/CD, AWS (EC2, S3)

Education

Bachelor of Science in Computer Science CGPA: 7.70	2026
Thakur Ramnarayan College of Arts and Commerce, Mumbai	
Higher Secondary Certificate (HSC) Percentage: 46.83%	2023
Durgadevi Saraf College, Malad(W)	
Secondary School Certificate (SSC) Percentage: 72.60%	2021
St. Mary High School, Dahisar(E)	

Professional Experience

Full Stack Intern at SDAC Infotech	Sep 2025 – Dec 2025
- Developed an Import–Export ERP system using MVC, improving workflow efficiency by 30% - Implemented role-based authentication and optimized MySQL schema, reducing data redundancy by 25% - Built responsive seller dashboards, improving usability and reducing manual tracking efforts by 35%	

Projects

Indian Stock Market Analyzer - Real-Time Market Intelligence & Trading Companion

- Developed a comprehensive stock analysis platform supporting NSE and BSE with live price feeds (1-minute to 1-day intervals) via yfinance, Alpha Vantage, and websocket-based streaming
- Implemented 15+ technical indicators including SMA, EMA, RSI, MACD, Bollinger Bands, and Fibonacci retracement with interactive overlays on candlestick charts
- Added fundamental data dashboard — quarterly results, profit/loss trends, debt-to-equity, promoter holding changes, and peer comparison
- Implemented secure authentication (JWT), role-based access, and database optimization using connection pooling and indexing for 10,000+ concurrent users
- Deployed microservices architecture on Vercel + AWS EC2 with Redis caching to handle 1,000+ API requests per second during market hours

Tech: Next.js 14 (App Router), Python FastAPI (microservices), PostgreSQL (TimescaleDB extension for time-series), Prisma ORM, Redis, WebSockets (Socket.io), Chart.js

Smart Expense Manager - AI-Powered Personal Finance & Budget Forecaster

- Built end-to-end expense tracking system with automated SMS/email receipt parsing using Gemini Vision API to extract merchant, amount, date, and category
- Implemented multi-currency support (INR, USD, EUR) with real-time forex conversion using OpenExchangeRates API
- Created interactive spending breakdown dashboards — pie charts, treemaps, and monthly trend lines with category-wise burn rate
- Built bill reminder system with overdue detection and push notifications for rent, credit cards, utilities, and subscriptions
- Implemented savings goal tracker — target amount, deadline, monthly recommended saving, and progress visualization

Tech: Next.js 14, PostgreSQL, Prisma, Gemini Vision API, TensorFlow.js (forecasting), Chart.js
